

Changing the Breeze

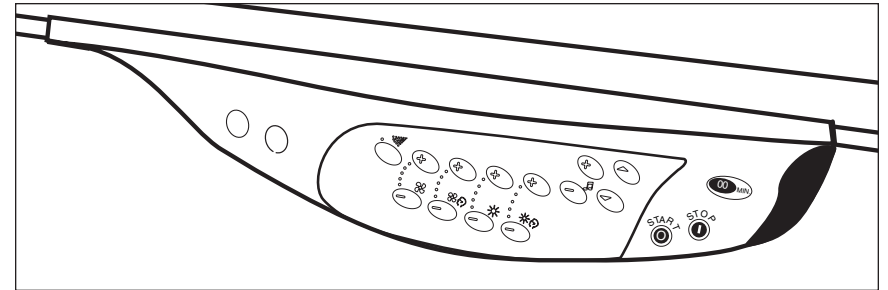

P90 Combo, P90 Mattress, Cayenne (v2 control pad) & SilverBullet SE

- 1) Access the Breeze jug under the unit and replace.
- 2) Go to the unit's control panel.
- 3) Press and hold the **Start & Stop** buttons down together, until display shows "PR."
- 4) Press the **Stop** button until display shows "P1."
- 5) Press the **Start** button until display shows "P4."
- 6) Press the **Stop** button and display will show a number.
- 7) Press the **Start & Stop** buttons together until the number disappears and display goes to zero. The Breeze hours are reset.
- 8) Press the **Stop** button to go back to "P4."
- 9) Press the **Start** button to go to "P5."
- 10) Bleed the Breeze by holding the **Stop** button until mist discharges evenly from all nozzles and then let go of the **Stop** button.
- 11) Hit **Start** button 2 times so display shows "PR."
- 12) Press and hold the **Start & Stop** button together until display goes to zero.
- 13) To save the changes into memory, shut off the main breaker to the unit for 30 seconds and then turn the breaker back on.
- 14) The unit is now re-set for Breeze.
